

CONS

CONS

- More dependencies to handle
- It's hard for library authoring
- Not componetized by default
- No JS magic in your CSS

```
.page:before {  
  content: 'KFC'  
}
```

CSS

```
export default () => (  
  <div className={styles.page}>  
    Chicken Shortage  
  </div>  
)
```
