CONS

CONS

- More dependencies to handle

- It's hard for library authoring

- Not componetized by default

- No JS magic in your CSS

```css
.page:before {
  content: 'KFC'
}
```

CSS

MODULES

```jsx
export default () ⇒ (
    <div className={styles.page}>
        Chicken Shortage
    </div>
)
```
